Projects

Big Basket application	Live Demo Link	Github Repo Link
------------------------	--------------------------------	----------------------------------

- HTML
- CSS
- JavaScript

- Developed an online grocery shopping application, 'BigBasket,' offering a diverse range of grocery, beverage, fruit, and vegetable products
- Designed and implemented the user interface using *HTML*, *CSS*, and *JavaScript* to create an intuitive shopping experience
- Implemented multiple product variety options for beverages and other items, enhancing user choice and satisfaction
- Utilized carousels to engage users and showcase a wide range of products on the home page, featuring appealing visuals
- Ensured website responsiveness by implementing CSS media queries for optimal user experience across devices

Experience

Achievement Private Coaching, Muzaffarpur | Teacher

March 2021 - present

- Instruct students in mathematics and physics, fostering a deep understanding of complex concepts through engaging and interactive teaching methods. Administer weekly tests, evaluating student performance to identify areas of improvement and tailor lesson plans accordingly. Develop comprehensive and challenging test papers, ensuring they align with curriculum standards and encourage critical thinking.
